SPECIFICATION

200 ~ 1000 °C

HIGH TEMPERATURE CALIBRATOR

ATM-1000

High Temperature Calibrator is a high-performance calibration instrument designed for the precise calibration of thermocouples, and temperature related instruments. at elevated temperatures. Featuring excellent temperature stability, uniformity, and rapid heating, it delivers accurate and reliable performance for laboratory, industrial, and field calibration applications where high-temperature accuracy is essential.

KEY FEATURES

- Wide high-temperature range for precise calibration
- High-power heating for rapid temperature stabilization
- Excellent temperature stability and uniformity
- High-accuracy digital temperature control
- Suitable for thermocouples, and temperature Other related Instruments

SPECIFICATIONS	
PARAMETER	DETAILS
Heating Block Material	Moulded Heater
Heating Block Dimension	100 × 100 × 200 mm
Heater Rating	1750 W
Bore Diameter × Depth	35 mm × 180 mm Depth
Controller Type	PID Controller
Display Range	0 to 1005 °C
Resolution	0.1 °C (up to 999.9 °C)
Stability	0.5 °C
Uniformity	< 0.2 °C
Standard Insert	Ø24.5 × 120 mm, 6 holes
Insert Hole Depth	150 mm
